In my line of work, (OTR driver), I need to know what is goin on in and around cities way befoe I get there so I can plan my trip into or around the city. XM Radio gives me the info I need to b able to do that. Also I pay a mouthly fee for that service, I dont think the N.A.B. should b able to tell myself or anyone that pays for something, what they can and cant listen to. Thats just like sat. TV if I pay for it, noone can has the rights to tell me I cant watch it, or listen to it.

The NAB, is bad mistaken in what they are tring to do here, half of the AM/FM radio stations DONT even give out local traffic and weather info, and when they, they dont really tell where its at so as anyone that is not a local knows what or where they are talkin about. (for ex.: I dont know if the locals call I-35 MLK blvd. in or around Dallas Tx. {Not say they do} but if the DJ comes on and says there is a wreck on MLK at whatever rd. I have know idea where that is, But if he say I-35 at exit42, whatever Rd. I know rite where he's talkin about.)

XM radio gives that info and they tell if weather is n the area in terms that a Nonlocal can have an idea of where he(or she) is from it.

I say again, I PAY FOR THE SERVICE, and XM provides the service and chargers a fee for it, They should b able to provide what they wish to provide and charge for it.

Thank You

James
